

# Daniel Alnemri . Jarvis Consulting

I'm a Full-Stack Developer with a story that began in middle school, where I crafted my first game on an old laptop. This early spark ignited a passion for technology and innovation, leading me to explore game development, full-stack development, and AI. I'm driven by the thrill of innovation and the satisfaction of seeing my creations come to life. What excites me most about the software industry is the endless possibilities for creativity and innovation. I'm eager to continue exploring the depths of technology, pushing boundaries, and making a tangible impact.

**Cluster Monitor** [GitHub]: Implemented a Linux Cluster Monitoring Agent tool aimed at system administrators and developers for monitoring hardware usage and specifications across Linux servers. It employs bash scripting for data collection, Docker for database containerization, and PostgreSQL for data storage. The agent gathers and stores metrics such as CPU and memory usage, disk I/O, and hardware specs, facilitating analysis for performance optimization and ensuring the smooth operation of the cluster.

**Core Java Apps** [GitHub]:
